

DIACLONE IMMUNOLOGY PRODUCTS

ANTI-HUMAN PERFORIN ANTIBODY FITC CONJUGATED

For research use only

SPECIFICATIONS

Catalogue Number	854.951.010
Clone	B-D48
Isotype	Mouse IgG1
Immunization	Natural human perforin
Hybridoma	Myeloma X63/AG.8653 x Balb/c spleen cells
Specificity	Recognizes human perforin, a 70kDa protein
Quantity	100 tests / 1ml
Purification	Ion exchange chromatography
Format	PBS with 5% BSA and 0.1% sodium azide*
Storage	Stable at 2-8°C for 12 months For longer storage freeze aliquots
Application	Suitable for flow cytometry
Working Dilution	Establish optimal dilution for the system being used. Suggested scheme; use 10µl of antibody to label 10 ⁶ cells or 100µl of whole blood

*Sodium azide is a poisonous and hazardous substance, handle and dispose of properly

**DIACLONE
MONOCLONAL ANTIBODIES**

Diaclone mAbs are highly specific, high quality mouse monoclonal antibodies. Available in a variety of formats they can be utilized in an extensive application range.

The Diaclone range of antibodies specific for a broad range of immunological proteins including human CD antigens, Cytokines, Cytokine/Chemokine receptors, Adhesion molecules and Apoptosis related antigens.

FLEXIBILITY

- Broad range of highly specific mouse anti-human antibodies
- Available for intracellular and cell surface membrane analysis
- Can recognize both recombinant and natural proteins acting as neutralizing, agonistic and enhancer antibodies
- Isotype Controls available to assess non-specific binding in assays
- Consistent, reliable and specific
